Dear Port Authority of New York & New Jersey Hiring Team,

I am excited to apply for the Engineering & Architecture Associates Program, as it offers a unique opportunity to leverage my technical skills to benefit a public service organization. My background in software engineering and data science, coupled with my passion for creating impactful solutions, aligns well with the Port Authority's mission of serving New York City and its residents. I am eager to use my expertise to enhance the infrastructure and services that play such an essential role in the lives of New Yorkers.

Throughout my academic and internship experiences, I have developed the ability to learn new technologies rapidly and adapt to dynamic team environments. For example, in my recent role at Triumph Group, I optimized the retrieval of critical files using a C++ program and facilitated the migration of forms to new platforms, ensuring compliance with industry standards. This experience, along with my problem-solving skills, would allow me to contribute effectively to the diverse projects within the Engineering & Architecture Associates Program.

I am especially inspired by the impact the Port Authority has on the greater New York area, a city that holds personal significance for me. Knowing that my work could contribute to public transportation, infrastructure resilience, and urban development is deeply motivating, as I believe these efforts significantly benefit the community. I am excited to take on the challenge of addressing real-world issues through a public service lens, knowing that my contributions will support a city that I hold in high regard.

Thank you for considering my application. I look forward to the opportunity to bring my technical skills, adaptability, and passion for public service to The Port Authority of New York & New Jersey.

Sincerely,

Mohammed Murshid
